Initial proposals summary

Who we are and what we do

The Boundary Commission for England is an independent and impartial non-departmental public body which is responsible for reviewing Parliamentary constituency boundaries in England.

2013 Review

We have the task of periodically reviewing the boundaries of all the Parliamentary constituencies in England. We are currently conducting a review on the basis of new rules laid down by Parliament. These rules involve a significant reduction in the number of constituencies in England (from 533 to 502), and require that every constituency – apart from two specified exceptions – must have an electorate that is no smaller than 72,810 and no larger than 80,473 (please refer to *A guide to the 2013 Review* for details of how this has been calculated).

Initial proposals

We have now completed the first stage of the review process and have published our initial proposals for the new Parliamentary constituency boundaries in England. Information about the proposed constituencies is now available on our website or in hard copy at a local ‘place of deposit’ near you.

What is changing in the North West?

The North West region has been allocated 68 constituencies – a reduction of seven from the current arrangement.

Due to the significant change required throughout the region, our proposals leave only seven of the 75 existing constituencies unchanged.

As it has not always been possible to allocate whole numbers of constituencies to individual counties, we have grouped

some local authority areas into sub-regions. It has also been necessary to propose some constituencies that cross county or unitary authority boundaries.

Sub-region	Existing allocation	Proposed allocation
Cheshire and the Wirral	15	13
Merseyside (less the Wirral)	11	10
Greater Manchester*	27	26
Lancashire	16	14
Cumbria	6	5

* Includes constituencies with areas in both Lancashire and Cheshire.

We have included the boroughs to the north of the River Mersey in our Merseyside sub-region, and have included the Borough of Wirral with the unitary authorities of Cheshire East, Cheshire West and Chester, Halton, and Warrington in another sub-region.

We propose one constituency that contains electors from both Cheshire and Greater Manchester, which combines the Cheshire East town of Poynton with the Borough of Stockport town of Hazel Grove.

Additionally, as the electorate of the County of Lancashire is such that it is not possible to allocate a whole number of constituencies, we propose another constituency that contains electors from both Lancashire and Greater Manchester, which combines part of the Lancashire Borough of Rossendale with the north of the Greater Manchester Borough of Rochdale.

We propose five constituencies entirely contained in the County of Cumbria.

How to have your say

We are consulting on our initial proposals for a 12-week period, from 13 September 2011 to 5 December 2011. We encourage everyone to use this opportunity to contribute to the design of the new constituencies – the more public views we hear, the more informed our decisions will be when analysing all the views we receive.

We ask everyone wishing to contribute to the design of the new constituencies to first read the *Initial proposals* report and accompanying maps before responding to us.

In particular, we would like to know:

- if you agree in full, in part or not at all with our initial proposals for the North West region;
- which sub-regions you agree with and why;
- which sub-regions you disagree with and why; and
- if you can propose alternatives for areas you disagree with that meet the statutory rules we set out in our report.

You can find more details of how to respond on our website, or you can write to us direct or email northwest@bcommengland.x.gsi.gov.uk. You can also find details of where and when we will be holding public hearings in your area on our website.

1. What is the Boundary Commission for England?

1. The Boundary Commission for England (BCE) is an independent and impartial non-departmental public body, which is required by Parliament to review Parliamentary constituency boundaries in England. We conduct a review of all the constituencies in England every five years. Our role is to make recommendations to Parliament for new constituency boundaries.

2. The Chair of the Commission is the Speaker of the House of Commons, but by convention he or she does not participate in the formulation of the Commission's recommendations, nor in the conduct of the review. The Deputy Chair, Mr Justice Sales, and two further Commissioners take decisions on recommendations for new constituency boundaries. Further information about the Commissioners can be found in the 'About us' section of our website.¹

3. Our website also contains all the information needed to view and comment on our initial proposals. You can also contact us with any general enquiries by emailing information@bcommengland.x.gsi.gov.uk, by calling 020 7276 1102, or by writing to:

The Secretary to the Commission

2. Background to the 2013 Review

4. In February 2011, the UK Parliament passed legislation² stating that all four Boundary Commissions covering the UK (there are separate Commissions for Scotland, Wales, and Northern Ireland) must conduct a review of Parliamentary constituency boundaries, and make recommendations to the Government, by October 2013. The four Commissions work separately, and this report covers only the work of the BCE and, in particular, introduces our initial proposals for the North West region.

5. Parliamentary constituency boundaries are important, as they define the area that a Member of Parliament will represent once elected to Parliament. The next General Election is expected to be in 2015 (as, at the time of writing and subject to legislation, the Government intends to introduce ‘fixed-term’ Parliaments – i.e. that last for five years). Therefore any recommendations we make, if accepted, are likely to be used for the first time at the General Election in 2015.

6. The legislation we work to states that there will be 600 Parliamentary constituencies covering the UK – a reduction of 50 from the current number. For England, that means that the number of constituencies must reduce from 533 to 502. There are also new rules that the Commission has to adhere to when conducting the Review – a full set of rules can be found in the BCE’s *A guide to the 2013 Review*,³ published in the summer of 2011, but they are also summarised later in this chapter. Most significantly, the rules state that every constituency we recommend (with the exception of two covering the Isle of Wight) must contain between 72,810 and 80,473 electors.

7. This is a significant change to the old rules under which Parliamentary boundary reviews took place, where achieving as close as possible to the average number of electors in each constituency was an aim but not an overriding legal necessity. For example, in England, constituencies currently range in electorate size from 55,077 to 110,924. Achieving a more even distribution of electors in every constituency across England, together with the reduction in the total number of constituencies, means that a significant amount of change to the existing map of constituencies is inevitable.

8. *A guide to the 2013 Review* contains further detailed background, and explains all the policies and procedures that we are following in conducting the Review, in greater depth than in this consultation document. We encourage anyone wishing to be involved in the Review to read this document to enable greater understanding of the rules and constraints placed on the Commission, especially if they are intending to comment on our initial proposals.

The rules in the legislation

9. The rules contained in the legislation state that every constituency in England (except two covering the Isle of Wight) must have an electorate of between 72,810 and 80,473 – that is 5% either side of the **electoral quota of 76,641**. The legislation also states that when deciding on boundaries, the Commission may also take into account:

- a. special geographical considerations, including the size, shape and accessibility of a constituency;

² The Parliamentary Voting System and Constituencies Act 2011, available at www.legislation.gov.uk

³ Available at www.consultation.boundarycommissionforengland.independent.gov.uk/publications and at all places of deposit

- b. local government boundaries as they existed on 6 May 2010;
- c. boundaries of existing constituencies; and
- d. any local ties that would be broken by changes in constituencies.

10. It is essential to understand that none of the factors mentioned in the list above overrides the necessity to achieve an electorate in each constituency that is within the range allowed, as explained previously. In particular, it should be noted that we are obliged to take into account local government boundaries as they existed in May 2010. Our initial proposals for the region and the accompanying maps are based on the wards as they existed in May 2010. *A guide to the 2013 Review* outlines further our policy on how, and to what extent, we take into account local government boundaries. We propose to use the local government districts and wards as at May 2010 as the basic building blocks for construction of constituencies.

11. We have also taken into account the boundaries of existing constituencies so far as we can. We have tried to retain existing constituencies as part of our initial proposals where possible, so long as the other factors can also be satisfied. As mentioned earlier in this chapter, because of the scale of change required to fulfil the obligations imposed on us by the new rules, this has proved difficult. Our initial proposals retain just over 9% of the existing constituencies in the North West region – the remainder are new constituencies (although in a number of cases we have been able to limit the changes to existing constituencies, making only minor changes as necessary to enable us to comply with the new rules).

The use of the regions used for European elections

12. Our proposals are based on the nine regions used for European elections. This report relates to the North West region. There are eight other separate reports containing our initial proposals for the other regions. In early 2011, following a consultation exercise on the issues, we decided to use these regions as a basis for working out our initial proposals. You can find more details in *A guide to the 2013 Review* and on our website. While this approach does not prevent anyone from making proposals to us that cross regional boundaries (for example, between the North West region and the North East region), in light of the reasons we have set out for the region-based approach and the level of support for this approach expressed in response to our consultation, we would need to have compelling reasons provided to us in order to persuade us to depart from the region-based approach.

Timetable for the 2013 Review

Stage one – initial proposals

13. In March 2011 we published breakdowns of the electorate for each ward, local authority area, and existing constituency, which were prepared using electorate data provided by local authorities and the Office for National Statistics. These breakdowns are available on our website.⁴ The Commission spent a number of months considering the factors outlined above and drawing up our initial proposals. We published our initial proposals for consultation for each of England's nine regions on 13 September 2011.

⁴ At www.consultation.boundarycommissionforengland.independent.gov.uk

Stage two – consultation on initial proposals

14. We are consulting on our initial proposals for 12 weeks, until 5 December 2011. Chapter 4 outlines how you can contribute during the consultation period. We are also hosting five public hearings in the North West, at which people can give their views (see chapter 4). Once the consultation has closed, the Commission will collate all the responses received, including transcripts of the public hearings.

Stage three – consultation on representations received

15. The legislation requires us to publish all the representations we receive on our initial proposals. This publication will mark the start of a four-week period, likely to be in spring 2012, during which anyone can make further written representations with respect to the representations we have received and published. Once we have all the representations from both consultation periods, the Commission will analyse those representations and decide whether changes should be made to the initial proposals.

Stage four – publication of revised proposals

16. If we decide that the evidence presented to us is such that it is appropriate to change our initial proposals, then we must (under the legislation) publish our revised proposals for the areas concerned, and consult on them for a further period of eight weeks. This is likely to be towards the end of 2012. During that consultation period, there is no provision for further public hearings, nor is there a repeat of the four-week period for commenting on the representations of others.

Stage five – final recommendations

17. Finally, following the consultation on revised proposals, we will consider all the evidence received at this stage, and

throughout the Review, before making final recommendations to the Government. The legislation states we must do this by 1 October 2013. Further details about what the Government and Parliament must do to implement our recommendations are contained in *A guide to the 2013 Review*.

18. At the launch of each stage of consultation we will be taking all reasonable steps to publicise our proposals so that as many people as possible are aware of the consultation, and can take the opportunity to contribute to our review of constituencies.

3. Initial proposals for the North West region

19. The North West region comprises the counties of Cumbria, Cheshire, and Lancashire (which are covered by a mix of district and county councils, and unitary authorities), and the metropolitan areas of Greater Manchester and Merseyside (covered by unitary authorities).

20. The region currently has 75 constituencies. Of these constituencies, only 22 have electorates within 5% of the electoral quota. The electorates of 51 constituencies currently fall below the 5% limit, while the electorates of two are above. As discussed in chapter 2, following our consultation on using the regions as the basis for our initial proposals, we have taken an initial decision that the North West region is to be allocated 68 constituencies, a reduction of seven.

21. In seeking to produce initial proposals for the region in which 68 constituencies, each with an electorate within 5% of the electoral quota, could be proposed, we first considered whether, and how, the local authority areas could usefully be grouped into sub-regions. We were mindful of seeking to respect, where we could, the external boundaries of local authorities. Our approach in attempting to group local authority areas together in sub-regions was based both on trying to respect county boundaries wherever possible and on achieving (where we could) obvious practical groupings such as those dictated in some part by the geography of the area.

22. Our division of the North West region into sub-regions is a purely practical approach. Respondents to our consultation are welcome to make counter-proposals based on other groupings of counties and unitary authorities, if the statutory factors can be better reflected in those counter-proposals.

23. The distribution of electors across the three counties and two metropolitan areas

in the North West is such that allocating a whole number of constituencies within counties, which fall within 5% of the electoral quota and avoid dividing wards, is not always possible. While Cumbria's electorate allows for five constituencies to be allocated to the county without crossing the county boundary, the County of Lancashire and the unitary authorities within it, with just over 1.1 million electors, would result in just over 14.5 constituencies being allocated to the county. While it would be possible to develop proposals in which either 14 or 15 whole constituencies with electorates within 5% of the electoral quota were contained within the County of Lancashire, doing so would make it particularly difficult to respect local ties and to avoid the division of wards between constituencies.

24. The electorate of the metropolitan County of Merseyside indicates that it should be allocated 13 constituencies. However, considering the county in its entirety would have required us to propose a constituency that crosses the River Mersey between Birkenhead (in the Borough of Wirral) and the City of Liverpool, as the electoral size and geographic shape of the wards in the Borough of Wirral make it impossible to create a whole number of constituencies within the peninsula without proposing the division of wards between them. We noted that no existing constituency crosses the river at this point, and that such a proposal met with significant opposition at the 5th General Review. In order to avoid proposing a constituency in which the River Mersey is crossed between Liverpool and Birkenhead, our Merseyside (less the Wirral) sub-region contains only the boroughs to the north of the River Mersey. Additionally, this configuration allowed us to avoid linking areas of Merseyside with areas in the County of Lancashire.

25. As a consequence, we have included the Borough of Wirral with the unitary authorities of Cheshire East, Cheshire West and Chester, Halton, and Warrington in a sub-region allocated 13 constituencies. The number of electors in this sub-region is such, however, that it is not possible to include every ward within 13 constituencies that fall within 5% of the electoral quota. In considering this area, we were particularly constrained by the size of the wards in the two new unitary authorities of Cheshire East, and Cheshire West and Chester.

26. We further noted that, if we respected the external boundaries of Greater Manchester, with just over 1.95 million electors, the sub-region would be allocated just over 25.5 constituencies, and that making proposals for 26 constituencies covering this area that respect local government boundaries would be extremely challenging.

27. Having carefully considered these issues, our conclusion is that a better outcome can be secured if the external boundaries of the Greater Manchester metropolitan area are crossed in two places. This has allowed us to propose constituencies which fall within 5% of the electoral quota while avoiding the division of wards and better respecting the borough boundaries in Greater Manchester. We propose to combine areas in the boroughs of Rossendale (in Lancashire) and Rochdale (in Greater Manchester) in one constituency that crosses the Greater Manchester-Lancashire boundary. We also propose to combine the Poynton area in Cheshire East with areas in the Borough of Stockport to the south east of Greater Manchester, across the Greater Manchester-Cheshire boundary. These constituencies are discussed in more detail later in this chapter.

28. Our initial proposals for the North West region result in: five constituencies covering the County of Cumbria; 14 whole

constituencies covering the County of Lancashire with one constituency straddling the Lancashire-Greater Manchester boundary; ten constituencies covering the Merseyside authorities to the north of the River Mersey; 13 constituencies covering the Wirral and the County of Cheshire with one constituency straddling the Cheshire-Greater Manchester boundary; and 24 constituencies covering the remainder of Greater Manchester.

Initial proposals for the Cheshire and the Wirral sub-region

29. There are currently 15 constituencies in this sub-region, only three of which (Congleton, Crewe and Nantwich, and Macclesfield) have electorates within 5% of the electoral quota. While the electorate of one constituency, Warrington South, is above the upper 5% limit, the electorates of many constituencies in this area fall significantly below the lower limit. This is illustrated by the existing Wirral West constituency which, at 55,077, has the lowest electorate of any constituency in England.

30. As mentioned previously, we propose to allocate 13 constituencies to this sub-region, a reduction of two from the current arrangement. However, the electoral size of the sub-region and the geographical features of the area prevent the inclusion of all wards within 13 constituencies and we therefore propose to include 11,805 electors from Poynton in Cheshire East in a constituency that predominantly contains electors from wards within the Borough of Stockport, in Greater Manchester.

31. We considered whether we could leave unchanged any of the three existing constituencies that had an electorate within 5% of the electoral quota. However, in order to develop proposals for the sub-region in which all the constituency electorates were within 5% of the electoral quota, and to facilitate

the reduction in the number of allocated constituencies, it was necessary to alter the boundary of the constituency of Macclesfield, leaving Congleton, and Crewe and Nantwich unchanged.

32. Within the sub-region, our options were limited by the peninsula covering the Wirral and, in particular, the size and shape of the wards in the District of Cheshire West and Chester.

33. Our proposed Chester constituency represents the only viable combination of wards in which the centre of the city of Chester is not divided between two constituencies. The constituency contains the centre of the city itself and extends north west towards the Wirral peninsula and east to incorporate Mickle Trafford and the surrounding area.

34. To the south, our proposed Winsford constituency largely reflects the existing Eddisbury constituency, though it expands to incorporate wards immediately south of the city of Chester, with which there are strong communication links. As a consequence, wards in the north are transferred elsewhere (see discussion on Northwich, below).

35. As discussed previously, our proposed constituencies of Congleton, and Crewe and Nantwich are unaltered from the existing constituencies.

36. Our proposed Northwich constituency incorporates many wards that are currently contained in the Tatton constituency, including the town of Knutsford and the surrounding area, with some which are currently contained in the Weaver Vale constituency, namely Northwich and the surrounding area, and the area surrounding Siddington, which is currently located in the Macclesfield constituency. The major towns

and surrounding areas are connected by a number of communication links that cross the proposed constituency.

37. The existing constituency of Macclesfield is largely unaltered though, as mentioned previously, we propose to include the town of Poynton in a constituency that predominantly contains wards from the Borough of Stockport (please see the section on the Greater Manchester sub-region for further detail), and the area surrounding Siddington in the proposed Northwich constituency. Additionally, our proposed Macclesfield constituency extends north-westwards to incorporate the town of Wilmslow, with which there are direct communication links.

38. The electorate of the boroughs of Halton and Warrington is too large to allow for three whole constituencies to be contained within the boroughs, without joining some electors with a Cheshire constituency. The electorate of the existing Warrington North constituency is too small, while that of Warrington South is too large, and we therefore propose a number of ward transfers between the two. Additionally, Warrington South is extended to incorporate three wards currently located in the Weaver Vale constituency with which the borough has close communication links. One ward from the Borough of Warrington is included in the Widnes and Runcorn constituency which, but for the transfer of two wards elsewhere (see discussion regarding Mersey Banks constituency, below), remains largely unchanged from the existing Halton constituency.

39. There are currently four constituencies within the Borough of Wirral, all of which have electorates that are significantly lower than the electoral quota. While the electorate of the borough suggests that it might be possible to propose three whole constituencies within the peninsula, the size and shape of the wards

are such that it would not be possible to do so without proposing a division of some wards between constituencies.

40. The existing constituencies of Birkenhead and Wallasey are slightly reconfigured both to achieve electorates within 5% of the electoral quota and to better reflect the development of the two towns. Many of the wards currently contained within the constituencies of Wirral South and Wirral West are included in our proposed Hoyle and Neston constituency, which extends south to incorporate the town of Neston. The communities within the constituency are connected by the A540 which runs throughout.

41. The remaining wards of the sub-region are included in our proposed Mersey Banks constituency, which stretches along the southern bank of the River Mersey and inland to Weaverham. Additionally, it incorporates the Borough of Halton wards of Ditton and Hale, on the north bank of the River Mersey. Consequently, the constituency is divided by the Manchester Ship Canal and the River Mersey, despite the nearest cross-river transport link being the Silver Jubilee Bridge between Runcorn and Widnes.

42. While we were keen to avoid proposing a constituency which contains detached parts, our modelling suggests that to do so, while maintaining a constituency which wholly incorporates the centre of the city of Chester, would have a number of consequences across the whole of the sub-region. These consequences would include: dividing the town of Winsford between two constituencies; dividing the town of Nantwich between two constituencies; the creation of a constituency that incorporates wards from the centre of Warrington with the town of Knutsford and the surrounding area; and leaving no retention of existing constituencies. We have referred

here to our reservations in proposing this constituency, but, on balance, we considered that our proposed cross-river Mersey Banks constituency allowed for the most satisfactory distribution of constituencies across the whole area.

Initial proposals for the Merseyside (less the Wirral) sub-region

43. There are currently 11 constituencies in this sub-region, only four of which (Knowsley; Liverpool, Riverside; St Helens North; and St Helens South and Whiston) have electorates within 5% of the electoral quota. The electorates of the remaining constituencies fall below the lower 5% limit – except for Liverpool, Riverside, those in the City of Liverpool are considerably lower than the electoral quota.

44. As mentioned previously, we propose to allocate ten constituencies to this sub-region, a reduction of one from the current arrangement.

45. We considered whether we could leave unchanged any of the four constituencies that had an electorate within 5% of the electoral quota. However, in order to develop proposals in which all the constituency electorates were within 5% of the electoral quota, and to facilitate the reduction in the allocation of constituencies by one, it was necessary to alter two. This left two – St Helens North, and St Helens South and Whiston – unchanged.

46. When developing proposals within this sub-region, we were constrained both by the large electoral size of the wards and the geography of the area. Invariably, we found that alterations to ensure that the electorate of one constituency fell within 5% of the electoral quota required reconfiguration of other constituencies in the vicinity.

47. Our proposed Southport constituency largely reflects the existing constituency of that name, but is extended south to incorporate the western half of Formby, which is directly connected to the town of Southport by the A565. The eastern half of Formby is included with the town of Maghull and part of Kirkby in our proposed Maghull constituency. It was not possible to contain the town of Formby wholly within one constituency while avoiding a cross-county constituency linking Sefton with Lancashire. In addition, we were constrained by the size and shape of the wards in the Borough of Sefton.

48. As the electorate of the existing constituency of Bootle is too small, we propose that it be extended north along the coast to incorporate much of Crosby, and south into the City of Liverpool to incorporate Kirkdale. The major centres of population are connected by strong communication links running both along the coast and inland. To compensate for this expansion, the St Oswald ward is transferred to our proposed Maghull constituency and part of Litherland is included in our proposed Liverpool North constituency.

49. Our proposed Liverpool North constituency also combines three wards that are currently included in the Knowsley constituency, specifically a large part of Kirkby, with the Liverpool suburbs of Walton and Fazakerley (currently in Liverpool, Walton) and the suburbs of Croxteth and Norris Green (currently in Liverpool, West Derby).

50. As our proposed Liverpool West Derby constituency no longer contains the City of Liverpool wards of Croxteth and Norris Green, it instead extends south to incorporate Old Swan, west to include Anfield, and east into the Borough of Knowsley to include Stockbridge.

51. While the electorate of the existing Liverpool, Riverside constituency falls within 5% of the electoral quota, it is necessary to propose amendments to compensate for alterations to a number of other constituencies in the vicinity. We propose that it extends inland to incorporate Everton, Kensington and Fairfield, and Picton, and that it no longer contains Kirkdale in the north or Mossley Hill in the south.

52. Mossley Hill is instead included with Cressington in our proposed Liverpool Wavertree constituency which contains many of the remaining City of Liverpool wards. Belle Vale and Speke-Garston are included in our proposed Huyton and Halewood constituency which, other than those included in Liverpool Wavertree, contains many of the wards that are currently included in Garston and Halewood, specifically the town of Huyton-with-Roby.

53. We consider that the use of commas in existing constituency names is currently inconsistent and sometimes does not aid clarity. We have therefore taken a policy decision that commas will no longer be included in the names of constituencies and this is reflected in our proposed constituency names within the City of Liverpool.

54. We do not propose any change to the existing boundaries of the constituencies of St Helens North, and St Helens South and Whiston.

Initial proposals for the Greater Manchester sub-region

55. There are currently 27 constituencies in this sub-region, only 11 of which have electorates within 5% of the electoral quota. The electorates of 15 constituencies fall below the lower 5% limit, while the electorate of one falls significantly above.

56. As mentioned previously, we propose to allocate 24 whole constituencies to this region, in addition to one constituency that incorporates electors from both Greater Manchester and Lancashire, and another that incorporates electors from both Greater Manchester and Cheshire East.

57. We considered whether we could leave unchanged any of the 11 existing constituencies that had an electorate within 5% of the electoral quota. However, in order to develop proposals in which all the constituency electorates were within 5% of the electoral quota, and to facilitate the reduction in the allocation of constituencies, it was necessary to alter all but two of these constituencies – Bury South and Wigan.

58. When developing proposals within Greater Manchester, we were constrained both by the relatively large electoral size of the wards within the sub-region and by the need to absorb electors from neighbouring sub-regions in two cross-county constituencies. Invariably, we found that alterations to ensure that the electorate of one constituency fell within 5% of the electoral quota required reconfiguration of other constituencies in the vicinity. However, we did find it possible to propose a number of constituencies that largely reflect existing constituencies, and 14 of our proposed constituencies are wholly contained within one borough.

59. We considered that the most appropriate point at which to cross the boundary between Greater Manchester and Lancashire is at the border of the Greater Manchester Borough of Rochdale and the Lancashire Borough of Rossendale. The resulting constituency, which we propose is named Rochdale North and Rawtenstall, includes wards in the north of the Borough of Rochdale with the area surrounding the Lancashire towns of

Rawtenstall, Bacup, and Whitworth, between which there are strong geographic and communication links.

60. The southern half of the town of Rochdale is included with the area surrounding the towns of Shaw and Royton in our proposed Rochdale South constituency.

61. Our proposed Oldham and Saddleworth constituency extends west to include a greater proportion of the town of Oldham than at present. To the west, the town of Middleton and much of the town of Chadderton are included with part of the town of Heywood in our proposed Middleton constituency. The remaining wards of the town of Oldham are included with much of Ashton-under-Lyne and Failsworth in our proposed Ashton-under-Lyne constituency.

62. The remaining part of the town of Ashton-under-Lyne is included with the town of Denton in our proposed Denton constituency. Additionally, the constituency includes part of the town of Bredbury. To the east, our proposed Stalybridge and Hyde constituency is unchanged but for the addition of the town of Dukinfield. The town of Reddish is included in our proposed Stockport constituency which is otherwise unchanged but for the inclusion of the ward of Davenport and Cale Green in Cheadle.

63. Our proposed Cheadle constituency is otherwise unchanged, but for the inclusion of the Stepping Hill ward in our proposed Hazel Grove and Poynton constituency, discussed below.

64. We considered that the most appropriate point at which to cross the boundary between Greater Manchester and Cheshire is at the border between the Greater Manchester Borough of Stockport and the District of Cheshire East. The existing constituency

of Hazel Grove is amended to incorporate the Cheshire East town of Poynton which has strong geographic and communication links with the remainder of the constituency. We propose that this constituency is named Hazel Grove and Poynton.

65. Our proposed Wythenshawe constituency includes the town of Wythenshawe and the surrounding area with Didsbury, rather than the east of Sale as at present. In addition to the inclusion of Didsbury in Wythenshawe, our proposed Manchester Withington constituency is also amended to incorporate two wards that are currently located in Manchester Gorton.

66. Our proposed Manchester Gorton constituency is also amended to incorporate the wards of Moss Side and Ardwick, which are currently located in the Manchester Central constituency. Additionally, we propose that the existing Manchester Central constituency extends west to incorporate wards from the City of Salford, specifically Salford Quays and the surrounding area.

67. We propose minimal change to the Blackley and Broughton constituency, which is extended to incorporate Moston and no longer contains the ward of Charlestown. Charlestown is instead included in our proposed Middleton constituency.

68. As mentioned previously, we propose no change to the existing Bury South constituency. The constituency of Bury North is only amended to include the Bradshaw ward.

69. Our proposed constituency of Bolton North combines wards to the north and west of the town of Bolton (which are currently included in the Bolton North East constituency) with the town of Horwich and the surrounding area (currently in the Bolton

West constituency). Our proposed Bolton South constituency includes all seven wards that are currently located in the Bolton South East constituency along with the ward of Brightmet, currently located in the Bolton North East constituency.

70. Our proposed Westhoughton constituency combines the towns of Westhoughton, Hindley and Atherton with part of Leigh. We propose no change to the existing Wigan constituency.

71. With the transfer of Hindley to our proposed Westhoughton constituency, our proposed Makerfield constituency extends south east to incorporate Golborne. Our proposed Leigh constituency includes the towns of Irlam and Walkden with much of the town of Leigh. The remaining wards that are currently located in the Worsley and Eccles South constituency are combined with the town of Swinton in our proposed Swinton constituency.

72. We propose minimal change to the Stretford and Urmston constituency, which is expanded to include Ashton upon Mersey. The remaining Borough of Trafford wards are included in our proposed Altrincham and Sale constituency, which combines Altrincham and Hale with much of Sale.

Initial proposals for the Lancashire sub-region

73. There are currently 16 constituencies in this sub-region, only four of which (Ribble Valley, Rossendale and Darwen, South Ribble, and West Lancashire) have electorates within 5% of the electoral quota. The electorates of the remaining constituencies fall below the lower 5% limit, some significantly so (such as Preston at 61,025).

74. As mentioned previously, we propose to allocate 14 constituencies to this sub-region, a reduction of two from the current

arrangement. However, the electoral size of the sub-region and the geographical features of the area prevent the inclusion of all wards within 14 constituencies, and we therefore propose to include 25,912 electors from the Lancashire Borough of Rossendale in a constituency that predominantly contains electors from wards within the Borough of Rochdale, in Greater Manchester.

75. We considered whether we could leave unchanged any of the four constituencies that had an electorate within 5% of the electoral quota. However, in order to develop proposals in which all the constituency electorates were within 5% of the electoral quota, and to facilitate the reduction in the allocation of constituencies, it was necessary to alter all but one – West Lancashire. As discussed above, we propose no change to the existing West Lancashire constituency.

76. As the electorate of the existing Chorley constituency is too small, we propose that it is expanded to incorporate all the wards of the Borough of Chorley, therefore respecting completely the borough boundary.

77. Consequently, while the electorate of the existing South Ribble constituency falls within 5% of the electoral quota, we found it necessary to propose some amendment to compensate for the inclusion of the town of Ecclestone and the surrounding area within the proposed Chorley constituency, described above. Our proposed South Ribble constituency therefore extends eastwards towards Bamber Bridge, the result of which is to re-establish the constituency boundary that existed before the 5th General Review.

78. We propose minimal change to the existing Blackburn constituency, which alters only to extend south to incorporate the suburb of Earcroft. The remaining Borough of Blackburn with Darwen wards are combined

with many wards that are currently located in the Rossendale and Darwen constituency and with those surrounding the town of Oswaldtwistle (currently located in the Hyndburn constituency) in our proposed Darwen and Haslingden constituency.

79. As discussed, we propose to include seven wards from the Borough of Rossendale, specifically the area surrounding the towns of Rawtenstall, Bacup, and Whitworth, in our proposed Rochdale North and Rawtenstall constituency, which also contains electors from the Borough of Rochdale (please see Greater Manchester sub-region, above, for further detail).

80. The remaining wards that are currently located in the Hyndburn constituency, namely Accrington and the surrounding area, are combined with the south of Burnley and the surrounding area in our proposed Burnley South and Accrington constituency, within which the M65 provides a strong communication link. The remaining wards that are currently located in the Burnley constituency are combined with all but three of the wards that are currently located in the Pendle constituency, specifically the towns of Colne and Nelson, in our proposed Burnley North and Nelson constituency, which also follows the course of the M65.

81. Our proposed Ribble Valley constituency extends east to include the town of Barnoldswick rather than west towards the district boundary, as at present. Additionally, we propose that it includes the Fishwick ward of the City of Preston, and that the town of Farington is instead included in the South Ribble constituency.

82. The small electorate of the existing Preston constituency enables us to propose its expansion to incorporate all but four of the City of Preston wards.

83. In the west of the City of Preston, the Lea ward is included, as at present, with wards from the district of Fylde in our proposed Fylde constituency. In order to increase the size of the electorate of this constituency, we propose that it stretches north to include the town of Poulton-le-Fylde.

84. As the electorate of the existing Blackpool South constituency is too small, we propose that the constituency is extended north to incorporate the Borough of Blackpool wards of Claremont, Layton and Warbreck, which are currently contained in the Blackpool North and Cleveleys constituency.

85. Consequently, we propose a reconfigured north Blackpool constituency, which stretches north along the coast to incorporate Fleetwood and inland to include Thornton. Our proposed name for the constituency is Blackpool North and Fleetwood; we note that it is largely similar to the constituency of the same name that existed prior to the 5th General Review.

86. Similarly, our proposed Lancaster constituency largely reflects the constituency that existed prior to the 5th General Review: it no longer contains the town of Fleetwood, but instead expands to incorporate many wards that are currently included in the Wyre and Preston North constituency, in addition to wards from the west of the Ribble Valley. The M6, which runs north-south throughout the proposed constituency, provides a strong communication link between the various communities within it.

87. The remaining wards in the sub-region are combined in our proposed Morecambe and Lunesdale constituency, which is largely similar to the existing constituency but now extends to include the Lower Lune Valley ward.

Initial proposals for the Cumbria sub-region

88. There are currently six constituencies in this sub-region, none of which has an electorate within 5% of the electoral quota. The electorates of all the existing constituencies in this county are substantially lower than the electoral quota. It was not therefore possible to leave any existing constituency boundary unchanged.

89. As mentioned previously, we propose to allocate five constituencies to this sub-region, a reduction of one from the current arrangement. When developing proposals, we noted that our options were limited due both to the large geographical but small electoral size of the wards within the county, and to the national, regional and geographic borders that form the boundaries of much of the county. We did not therefore find it possible to avoid proposing constituencies in which coastal communities were combined with those some distance inland.

90. In order to increase the size of the electorate of the existing Barrow and Furness constituency, we propose that it is extended eastwards beyond Ulverston to include Grange-over-Sands. We consider that combining these communities, all of which are linked by their proximity to Morecambe Bay and are connected by the Cumbrian Coast Line railway, is preferable to proposing an extension inland beyond the Furness Fells. We propose that the constituency is renamed Barrow-in-Furness, to reflect the name of the major town within the constituency.

91. Such a configuration in Barrow-in-Furness allows us to propose a constituency to the north that includes the entirety of the Borough of Copeland and extends along the coast from Millom to Harrington. In order to propose a constituency whose electorate falls within 5% of the electoral quota, it is also necessary to propose the inclusion

of one Borough of Allerdale ward and the extension of the constituency inland over the Cumbrian Mountains and the Furness Fells to incorporate Windermere and the surrounding area.

92. We propose that the towns of Kendal and Penrith are combined with the towns of Appleby-in-Westmorland, Kirkby Lonsdale, Kirkby Stephen, and Sedbergh in a constituency that extends from the outskirts of Carlisle to the Lancashire border. The M6 provides a strong communication link between the communities within the constituency, which we propose is named Kendal and Penrith.

93. The electorate of the City of Carlisle is such that it is not possible to include all wards within one constituency. However, all but one of the City of Carlisle wards are contained in our proposed Carlisle constituency, which stretches north to the border with Scotland.

94. We considered that the most appropriate City of Carlisle ward to be included in a different constituency, for both geographic and electoral size reasons, was Dalston on the southern outskirts of the city. We therefore propose that Dalston is included with all but one of the Borough of Allerdale wards, which are linked by the A66, and four District of Eden wards to the west of Penrith, in our proposed Workington and Keswick constituency.

4. How to have your say

95. We are consulting on our initial proposals for a 12-week period, from 13 September 2011 to 5 December 2011. We encourage everyone to use this opportunity to contribute to the design of the new constituencies – the more public views we hear, the more informed our decisions will be when analysing all the views we receive.

96. In particular, we ask people to bear in mind the tight constraints placed on the Commission by the rules set by Parliament, as well as the decisions we have taken regarding adoption of a regional approach and use of local government wards discussed in chapter 2 and in the BCE's *A guide to the 2013 Review*. Most importantly:

- a. We cannot recommend constituencies that have electorates that are more or less than 5% from the electoral quota (apart from the two covering the Isle of Wight).
- b. We are basing our initial proposals on local government ward boundaries (as at May 2010) as the building blocks of constituencies. Our view is that, in the absence of exceptional and compelling circumstances, it would not be appropriate to divide wards in cases where it is possible to construct constituencies that meet the 5% statutory requirement without doing so.
- c. We have constructed constituencies within regions, so as not to cross regional boundaries. Compelling reasons would need to be given to persuade us that we should depart from this approach.

97. These issues mean that we encourage people who are making a representation on a specific area to bear in mind the knock-on effects of their proposals. The Commission must look at the recommendations for new constituencies across the whole region (and, indeed, across England). We therefore

ask everyone wishing to respond to our consultation to bear in mind the impact of their counter-proposals on neighbouring constituencies, and on those further afield across the region.

How can you give us your views?

98. There are two ways you can give us your views on our initial proposals: in writing (including by email or through the online form on our website), or in person at one of a series of public hearings we are conducting during the consultation period. People are welcome to both attend a hearing and send us a written representation.

Written representations

99. We encourage everyone to make use of our consultation website, at www.consultation.boundarycommissionforengland.independent.gov.uk, when contributing to our consultation. The website contains all the *Initial proposals* reports and maps, the electorate sizes of every ward, and an online facility where you can have your say on our initial proposals.

100. You can also contribute to our consultation by writing directly to us at: Boundary Commission for England, 35 Great Smith Street, London SW1P 3BQ. Or email us with your views, at: northwest@bcommengland.x.gsi.gov.uk. If you wish to comment on more than one region, please send your email to reviews@bcommengland.x.gsi.gov.uk. If you wish to write to us directly, we encourage you to follow the structured approach outlined below and on the separate summary sheet, copies of which can be found at your local place of deposit, or downloaded from our website at www.consultation.boundarycommissionforengland.independent.gov.uk.

101. We encourage everyone, before submitting a representation, to read our approach to data protection and, in particular, the publication of all representations and

personal data within them. This is available at www.consultation.boundarycommissionforengland.independent.gov.uk, or by phoning 020 7276 1102.

Public hearings

102. The Commission will be holding public hearings across all the English regions. In the North West region we will be hosting five public hearings during the consultation period – the maximum number allowed by the legislation. Our website (www.consultation.boundarycommissionforengland.independent.gov.uk) has more details of these hearings, and an opportunity to register to attend and speak. The table below shows the locations and dates of the hearings in the North West region.

Locations and dates of public hearings

City/town	Location	Dates
Manchester	Britannia Hotel Manchester, Portland Street, Manchester M1 3LA	Tuesday 11 – Wednesday 12 October 2011
Chester	Brook Mollington Banastre Hotel, Parkgate Road, Chester, Cheshire CH1 6NN	Thursday 13 – Friday 14 October 2011
Carlisle	Civic Centre, Rickergate, Carlisle, Cumbria CA3 8QG	Monday 17 – Tuesday 18 October 2011
Liverpool	Radisson Blu Hotel Liverpool, 107 Old Hall Street, Liverpool L3 9BD	Thursday 20 – Friday 21 October 2011

City/town	Location	Dates
Preston	Macdonald Tickled Trout Hotel, Preston New Road, Samlesbury, Preston, Lancashire PR5 0UJ	Monday 24 – Tuesday 25 October 2011

103. The purpose of the hearings is for people to have an opportunity to make representations orally to an Assistant Commissioner, who will chair the hearings and subsequently provide the Commission with a report on their findings. The hearings differ from the way we used to conduct ‘public inquiries’ in past reviews – these were much more judicial in style, with people being allowed to cross-examine each other. The new legislation that Parliament has introduced specifically rules out such inquiries, specifying instead that we host public hearings. These are intended purely as a way for people to make representations orally, direct to representatives of the Commission, as well as to provide an opportunity for the Commission to explain its proposals.

104. It is important to stress that all representations, whether they have been submitted through the online facility on our website, made in person at a hearing or sent to us in writing or by email, will be given equal consideration by the Commission. Therefore it does not matter if you are unable to attend or speak at a public hearing – even after the last public hearing in the North West region has been completed on 25 October 2011, you will still have six weeks left to submit your views to us. By statute, time for the public hearings is strictly limited and you may wish to ensure that your full representations about our proposals are made to us in writing.

105. You can find more information about public hearings, and can register to attend, on our website at www.consultation.boundarycommissionforengland.independent.gov.uk, or by phoning 020 7276 1102.

What do we want views on?

106. While you are welcome to write to us on any issue regarding our initial proposals, it would aid our understanding and analysis if you, when contributing, followed the structured approach available on our consultation website at www.consultation.boundarycommissionforengland.independent.gov.uk. This structured approach is also outlined below and available in our separate summary leaflet (copies of which are available in places of deposit and on our website). We encourage anyone wishing to contribute to the formation of our final recommendations to follow this approach. The structured approach will also allow us more easily to identify representations on specific areas, or from specific people, during the subsequent four-week period of consultation (referred to in chapter 2).

107. We would particularly like to ask two things of those considering responding to our consultation. First, if you support our proposals, please tell us so, as well as telling us where you object to them. Past experience suggests that too often people who are happy with our proposals do not respond in support, while those who object to them do respond to make their points. That can give a rather distorted view of the balance of public support or objection to proposals, and those who support our initial proposals may then be disappointed if they are subsequently revised in light of the consultation responses. Second, if you are considering objecting to our proposals, do please use the resources (maps and electorate figures) available on our website and at the places of deposit to put forward counter-proposals that are

in accordance with the rules to which we are working.

108. Specifically, while anyone is welcome to submit views in whatever format, we are looking for views structured around the following questions:

- a. Do you agree in full, in part or not at all with our initial proposals for the North West region?
- b. Which sub-regions do you agree with and why?
- c. Which sub-regions do you disagree with and why?
- d. What are your alternatives for areas you disagree with that meet the statutory rules set out in chapter 2?

109. Above all, however, we encourage everyone to have their say on our initial proposals and, in doing so, to become involved in drawing the map of new Parliamentary constituencies. The more views we get on our initial proposals, the more informed our consideration in developing those proposals will be, and the better we will be able to reflect the public's views in the final recommendations we present in 2013.

Annex: Initial proposals for constituencies, including wards and electorates

Constituency	Ward	District/borough/city/county	Electorate
1. Altrincham and Sale BC			80,385
	Altrincham	Trafford	8,242
	Bowdon	Trafford	7,244
	Broadheath	Trafford	9,313
	Brooklands	Trafford	7,908
	Hale Barns	Trafford	7,582
	Hale Central	Trafford	7,373
	Priory	Trafford	7,762
	St Mary's	Trafford	8,732
	Timperley	Trafford	8,392
	Village	Trafford	7,837
2. Ashton-under-Lyne BC			72,954
	Chadderton South	Oldham	8,073
	Failsworth East	Oldham	7,941
	Failsworth West	Oldham	7,777
	Hollinwood	Oldham	7,503
	Medlock Vale	Oldham	8,110
	Werneth	Oldham	7,527
	Ashton Hurst	Tameside	8,853
	Ashton St Michael's	Tameside	8,566
	Ashton Waterloo	Tameside	8,604
3. Barrow-in-Furness CC			73,677
	Barrow Island	Barrow-in-Furness	1,797
	Central	Barrow-in-Furness	3,037
	Dalton North	Barrow-in-Furness	4,873
	Dalton South	Barrow-in-Furness	4,789
	Hawcoat	Barrow-in-Furness	4,240
	Hindpool	Barrow-in-Furness	4,325
	Newbarns	Barrow-in-Furness	4,329
	Ormsgill	Barrow-in-Furness	4,374
	Parkside	Barrow-in-Furness	4,328

Glossary

Assistant Commissioner	Independent person appointed at the request of the BCE to assist it with the discharge of its functions.
Borough constituency abbreviated to BC	Parliamentary constituency containing a predominantly urban area.
County constituency abbreviated to CC	Parliamentary constituency containing more than a small rural element.
Designation	Classification as either a borough constituency or as a county constituency.
Electorate	The number of registered Parliamentary electors in a given area.
(Statutory) Electorate range	The statutory rule that requires the electorate of every constituency (as at the review date) to be within 5% of the UK electoral quota.
Final recommendations	The recommendations submitted in a formal final report to the Government at the end of a review. They may – or may not – have been revised since the initial proposals in any given area.
General review	Major review of all Parliamentary constituencies in England at the same time. From 2011 all Parliamentary constituency reviews are general reviews.
Initial proposals	First formal proposals published by the BCE during the review for public consultation.
Public hearing	Formal opportunity in a given area for people to make oral representations, chaired by an Assistant Commissioner. In each region of England there may be no fewer than two and no more than five hearings, and each may last a maximum of two days.
Representations	The views provided by an individual, group or organisation to the BCE on its initial or revised proposals, either for or against, including counter-proposals and petitions.
Review date	Proposals must be based on the numbers of electors on the electoral registers on this date, which is defined in the Act as the date two years and ten months before the final report is to be submitted (i.e. 1 December 2010 for the review that is to conclude with a final report by 1 October 2013).
Revised proposals	The initial proposals as subsequently revised.
UK electoral quota	The average number of electors in a constituency, found by dividing the total electorate of the UK (less that of the four specific ‘protected’ constituencies) by 596.
Unitary authority	An area where there is only one tier of local council (above any parish or town council). This contrasts with those ‘shire district’ areas that have two tiers (i.e. both a non-metropolitan county council and a district/borough/city council).
